

Infrastructure

The [Department of Information Technology and Electrical Engineering \(ITET\)](#) offers a modern computer infrastructure available to you during your studies at the department.

On top of that you have fast access to the Internet with:

- Your own eMail address
- Access to the World Wide Web (WWW)
- Personal WWW-Homepage

Language issues

We try our best to provide the most important information on this web site both in English and in German. However, it is beyond our means to translate all documents - which we partly receive from other sites on the Internet. So it may happen that a document is only available in German. In most cases, however it is the other way round.

Additional services

In addition to the services offered by [ITET](#) you have also access to the services provided by the [Computer Center of ETHZ](#) .

On our [Statistics](#) page you will find overview of the computer usage.
